TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Python, C++, React.js

Technologies: Git, Arduino, TinkerCAD, Blender

Libraries: jQuery, NumPy, pynput, Matplotlib

PROJECTS

CNDR | Hack the North 2022 Project | [React.js](#)

September 2022

- A React app that tracks wildfires live and tailors mitigating solutions for land owners in the agricultural and lumber industry.
- Calls the Google Maps and NASA's Earth Observatory Natural Event Tracker API to create a live map of wildfires around the world.
- Uses Open Weather Map and a shortest path algorithm to determine risk levels of a location and suggests a course of action accordingly.

Personal Website | [Html/CSS](#), [Javascript](#)

August 2022

- Designed and launched a personal site with HTML/CSS + JavaScript optimized for desktop and mobile use.
- Incorporates responsive, modern project pane design with smooth animations.

Weather App | [Html/CSS](#), [Javascript](#)

August 2022

- Designed and launched a web application using HTML/CSS + JavaScript optimized for desktop and mobile use.
- Uses API calls from Open Weather Map to receive the information.
- Includes a modern dashboard design and an animated background.

PyTetris | [Python](#)

June 2022

- Implemented the retro game "Tetris" using Python and Pygame from scratch. Included user features such as fast block placement and arrow key control.
- Cycled through design iterations, using debugging tools to solve an issue where blocks left the grid before they appeared.

Traffic-Intersection | [C++](#), [Arduino](#), [TinkerCAD](#), [Blender](#)

June 2022

- Processed LED signals using parallelization and timers with Arduino C to design and build a traffic light intersection system.
- Proposed, debugged, and optimized a functioning prototype using Blender and TinkerCAD software.

Auto Clicker | [Python](#)

June 2022

- Created an auto clicker in Python using threading and pynput.
- Used OOP principles to organize code and a running listener to check the program state.

VOLUNTEER EXPERIENCE

Haven

May 2022 – Present

Volunteer

Remote

- Haven is a safety expert-approved app used by students to quickly connect with loved ones and the police in emergencies.
- Advocating for campus safety in schools and universities by launching marketing campaigns on social media.

EDUCATION

Earl Haig Secondary School

Sep 2020 – June 2024

Ontario Secondary School Diploma. Honour Roll.

Toronto, ON

- **External Coursework:** Edx: NYUx - Introduction to C++, NYUx - Advanced Programming in C++, Harvard CS50, Cisco IT Essentials, Codecademy: Introduction to UI and UX Design, Learn Javascript
